Problem1:
ARIMA model
LSTM model
Predict interval for the number of the reported results
Attributes of the word
commonness rating
entropy
frequency
number of letters
number of vowels
The percentage of Hard Mode
The percentage of (1,2,3,4,5,6,X)
Problem4:
History and new attributes of a word
PCA
word
semantics
phonetic
GMM
Words' difficulty
Three Level:
Easy medium difficult
Identify attributes
Classify "EERIE"
A future word
A future date
Distribution of the reported results
1 try
2 tries
...
6 tries
X tries
Linear models
Tree models
Stacking model
Predict "EERIE"
The number of reported results varied over time
The percent of Hard Mode over time
The distribution of the results (1,2,3,4,5,6,X)
The proportion of the position of the 26 letters in the word
Find some interesting things
Problem2:
Problem3:
