(a) Solved points: cost against ecology
Net present cost (million CNY)
Ecological score over 15 years (effective ha-yr)
100% target
64.4
80% target
40.5
60% target (base)
25.3
40% target
14.2
20% target
4.8
0% target
−4.9
lower cost is better
points are separate solves
(b) Shelter area built (ha)
(c) PV installed by year 15 (MW)
(d) MIP optimality gap (%)
solver tolerance
Ecological target (% of best feasible)
